Paul / Shawn . Please confirm receipt. The consultation in London is critical they will not agree the house. The doctor is holding the afternoon of the 6th July open at Harley St. but keep in mind the visit could take 2 hours plus . Thanks. Bob<T

Subject: RE: Artist Insurance

Paul . They will not accept that . They are insisting that this be done in Harley St (a 50 min drive at that time of day). The equipment is all installed in a specialist suite and is readily available for use. The doctor is however available through the afternoon so if 1400 hrs is a bit early we can go later but it will have to be London. The suite has a private access area and they would be awaiting his arrival.

There is a good spin on this in that if he sails through the tests we can put an end to the press garbage once and for all.

I await hearing from Dr Murray. Bob<T

Bob,

Dr Murray copied here. We need to do this at MJ's house. Dr Murray can comment on the availability of the records.

24th June 2009

Gentlemen,

Please review the following e-mail trail. Justin Burns is the Senior Underwriter at Cathedral Capital, the Lloyd's Syndicate that leads this insurance policy. Ian France is the Senior Broking Director and one of the founders of Robertson Taylor Insurance Brokers Limited.

We first became aware of these medical stipulations on Monday 22nd June in the afternoon, following which we have had several protracted discussions with insurers in attempts to alleviate or amend their requirements. Insurers have, however, refused to move on this as having consulted with the doctor, and given the huge amount of speculation in the media regarding the artist's health, they feel that if they are to consider providing illness cover on this particular artist, they must have a very thorough medical report.

The insurer registers his major concerns in the second of the 2 e-mail letters in that he feels that insufficient information has been forthcoming. This includes the last 5 year medical detail and the absence of comment on possible press speculation as to the artist's health, especially the media articles about skin cancer.

With the medical scheduled for PM on the 6th July we must act quickly to ensure that we are able to comply with these requirements. They can be summarised as below.

1. MJ will need to attend the doctor at a secure location in Harley Street in London.
2. MJ will need to agree to actively allow and assist with the various tests.
3. We have been informed that the doctor would like to examine MJ alone, and with no other party (even Dr Murray) present in the examination room.
4. MJ will have to set aside sufficient time for the examinations - it could take in excess of 2 hours to complete this consultation.
5. We must locate and supply the 5 year medical record as a top priority.

The insurers have been firm from the very beginning of the coverage that they will only give illness cover after completion of a further medical and also a review of MJ during a rehearsal. We have made numerous efforts to remove these stipulations.

As regards to item 5 I understand that Dr Murray is to contact me shortly in order that I can guide him on what is needed.

Shawn asked recently if there is any possibility of Term or disability insurance. At this moment we have been unable to secure any interest for the Term Life aspect, but needless to say with the medical information that could change. We are still working on a permanent disability quotation.

Dear Bob,

I refer to our various conversations and in particular the ongoing medical requirements by Underwriters and can confirm that after numerous conversations with the Underwriters in question, despite our representations the Underwriters will require the medical examination to be conducted as stated in the emails below. I have specifically asked whether Doctor Murray can be present at the examination and have been advised that whilst the Underwriters have no specific objection to that being the case the examining Doctor (Dr. Ettlinger) has stated that he is not willing to conduct the examination on that basis.

If the examination together with the Artist's full medical report is not concluded in the method prescribed there will be absolutely no possibility of any illness cover being provided.

The time line for the availability of the Doctor is running out as he has to reschedule his afternoon appointments for the afternoon of the 6th in order to facilitate the examination.

I also confirm that I have advised the lead underwriter that you will be dealing direct with Dr. Murray to obtain the details of the five year medical history, and he is happy for you to do so.

Best regards
Ian France

Exhibit 677 - 140

Dear Ian

As discussed yesterday there are several reasons why we need the depth of medical being required and at the location specified.

1. Firstly and most importantly Dr Ettlinger advised what is being proposed is no different than would be considered the 'norm' when carrying out a full medical on a 50 year old individual. Let alone one who is about to embark on a major tour.
2. Dr Ettlinger further advised it would be impossible to carry out a satisfactory medical at the artists home due to the unavailability of essential medical equipment there.
3. Despite many requests the 5 year medical history still has not been provided
4. Despite many requests the artists fitness programme (5/6 hours a day) has not been provided
5. The whole media circus has also ensured a very negative edge to the situation. As you know there have been several occasions we have asked the assured to confirm or deny press speculation, always with no response.
6. There have been several high profile medical issues over the years, either confirmed by the act, his management or in a court of law – none of which appear on the medical originally submitted for our consideration

Given all of the above, the high profile nature of the risk and the relentless questions and clarifications of the situation we are having to provide to our own management, I am sure you accept anything less would not be considered prudent and arguably negligent on are part.

With regard to the other specialists involved, we will be more than happy to provide full details of who they are. However until such time as we have a confirmed time that the artist will be available to attend the medical it will be impossible to confirm who is available.

Kind regards
Justin

Ian

Further to our discussions, wide of the basic examination and bloods etc

The specialist examinations are required in order to fully assess the medical risks of the performer whom you are insuring.

Clearly his performance is very physical and we would want an expert musculoskeletal orthopaedic surgeon to advise on his ability after so many years without being on stage to perform , the person who would be involved is the most expert orthopaedic surgeon in UK and advised many high performance athletes .

In regard to his cardio and respiratory capacity the cpx measures heart lungs oxygen etc and he would be wired up so that this can be performed with ecg leads and a mouth piece

Further at this time the 2 specialists required for these tests are currently only available on the Monday afternoon, if the medical is to be any other time please advise URGENTLY

Trust this helps
Kind regards
Justin
